

**Patient Information:**

- Patient ID: ABC987654
- Name: Jane Smith
- Date of Birth: 05/10/1980
- Gender: Female

**Date of Report:** 06/25/2024

---

**Examination Details:**

- Modality: MRI Brain
- Date and Time of Examination: 06/25/2024, 2:00 PM
- Referring Physician: Dr. Michael Johnson
- Clinical Indication/Reason for Examination: Evaluation of persistent headaches

**Imaging Technique:**

- Description of the technique used: Axial T1-weighted, T2-weighted, FLAIR, and diffusion-weighted sequences acquired
- Specific settings or protocols: No contrast agent administered
- Radiation dose: Not applicable

**Findings:**

- No intracranial hemorrhage or acute infarction noted
- Mild chronic microvascular ischemic changes observed
- No evidence of mass lesions or significant abnormalities

**Impression:**

- Mild chronic microvascular ischemic changes without acute findings
- No evidence of significant intracranial pathology
- Recommend clinical correlation and consideration of vascular risk factor management

**Comparison Studies:**

- No prior MRI brain studies available for comparison

**Additional Comments:**

- None

**Specialist Comments:**

- None
